

Machine Introduction

JB-800S/1050S Full automatic stacker can combine with full-automatic cylinder type screen press and all kinds of dryer together to collect the paper and make them in order automatically.

Main features:

1. The whole machine is controlled by PLC, collecting printing substrate and making the paper in order automatically.
2. Photoelectricity monitoring, two sides of baffles run when the paper come into the plate.
3. Paper conveying system is controlled by inverter with stepless speed regulation and conveyor belt guide the idler wheel to feed the paper.
4. Pneumatical elements control the jogger action, which avoid paper to be broken or other damage.
5. Following all kinds of paper size, paper jogging device can be adjusted from back, left and right easily and conveniently.
6. Induction sensor make the stacking board down automatically and keep paper collect smoothly.
7. Paper stacker has limitation safety mechanism at up and down position to avoid the machine from damaged.
8. Paper jam and paper pile height supervision and make the printing press stop in-line.
9. Connected with the printing part which can control the printing part's running.
10. Paper counting function.
