

Machine Introduction

Application: This machine is suitable for slitting and rewinding such various Roll materials as BOPP, PET, CPP, CPE, PVC, aluminum foil and paper, etc. And Can cut edge, separate and cut material according to different requirements during production.

Features:

The machine **adopts double slip axis for rewinding**, it can make the paper core have a slip frequency to make sure every roll compactness(after slitting) is same.

1. This machine is a kind of vertical slitting & rewinding machine.
2. Independent master control panel, more flexible and even easier operation.
3. Automatic EPC deviation correction system for unwinding, photocell is suitable for tracking the edge and color of transparent material.
4. Air inflatable shaft for unwinding, automatic tension controller and magnetic powder brake for unwinding tension control.
5. Double cam shaft for rewinding, Magnetic clutch control for rewinding tension control.
6. Main motor with frequency converter for speed regulation.
7. Equipped with rim charge conveying device.
8. Automatic meter counting device.
