

Machine Introduction

YZFM series Automatic Thermal Film Laminating Machine, is composite device for thermal film and paper lamination. Mainly composed of paper feeder, laminating unit and delivery unit. Electric centralized control by PLC, pressing roller built-in oil heating. High speed models heating by mold temperature machine to ensure the laminating temperature and precision. It has the advantages of reasonable structure, and high degree of automation, realization of one person operation, save labor. It is the first choice for large and medium sized film laminating products and printing factory.

Features

1. Using converter to control speed, running steady.
2. Due to the machine controlled by electric appliances, so it only needs one operator to operate.
3. The main machine uses oil to keep constant temperature of heating roller's surface is average.
4. Automatic boosting, maintaining pressure by hydraulic, guaranteed laminating quality and production speed.
5. Main pressure roller uses high temperature resistant material, quality is stable.
6. Installed film cutting and punching mechanism, and paper surface punching after film lamination.
7. Compounded heating roller adopts polishing technique, enhance the quality of the products.
8. Roller internal hot oil circulation, ensure less error of roller surface temperature.

Technical Specifications

Model	YZFM-920
Max. sheet size	920x1040mm
Min. sheet size	325x325mm
Paper thickness	105-500g/m ²
Max. laminating width	900mm
Max. laminating speed	10-50m/min
Laminating temperature	Approx 85°C~125°C
Power	AC380V/-3PH/50Hz
Total power	26KW
Machine weight	3500kg
Dimension	8300x1850x1900mm

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
