

GW1700-2 Servo Precision High Speed Sheet Cutter Machine

Machine Introduction

Servo Precision High Speed Sheet Cutter apply the advanced imported technique. The servo motor, AC transducer, the conveyor belt and pneumatic vibrator apply international brand; the electrical system adopts SCHNEIDER & OMRON to make the cutting speed fast and stable. Germany precise bearing and cutting knife assure the high cutting precision. The touching screen makes the operation easy. The anti-curve rack assures the paper flat. This machine is the paper processing machine which is very popular in the paper making and printing industry. It can improve the efficiency and benefit of your work.

Features:

1. Adopt Siemens control system and AC servo control device to make the cutting speed of the machine faster, more accurate and more stable
2. 10-inch human-machine screen double touch screen (with Internet of Things), and has a self-diagnostic function, making the operation simple and convenient.
3. With a large recurve structure, the cut paper is flatter and flatter.
4. This machine is suitable for a wide range of applications, such as cardboard, coated paper, kraft paper, cultural paper, double-coated paper, gold and silver cardboard, tobacco and alcohol packaging paper, aluminum foil paper, laser paper, etc. The King of Paper has a wide range of applications, such as cardboard, coated paper, kraft paper, cultural paper, double-coated paper, gold and silver cardboard, tobacco and alcohol packaging paper etc.

Technical Specifications

Model	GW1700-2
Cutting type	Single rotary sheeter
Applicable range of paper	45-550g/m ²
Max. paper roll diameter	1800mm
Max. paper-cutting width	1700mm
Range of cutting length	450-1670mm
Cutting sheet number	2 sheets
Cutting precision	≤1000mm: ±0.5mm (Cutting length)
Max. cutting speed	300 cut/min
Max. feeding speed	300 m/min
Max. paper stacking height	1500mm
Air pressure source requirement	0.8Mpa
Power	380V*50HZ
Gross weight	15800KGS
Full-load power	30kw
Dimensions	12000x4200x2300mm

Configurations

No	Name	Brand Model	Origin
1	Dual computer display screen (with IoT)	FLEXEN 10 inches color touch screen	Joint Venture
2	Ball-lead screw	Ball-lead screw	China
3	Double rack	Sun wheel receiving paper positioning	China
4	Control center	PLC/SIEMENS PLC	Germany
5	Servo drive	INOVANCE	China
6	Servo motor	INOVANCE	China
7	Overload protection switch	Schneider	France
8	Relays	Schneider	France
9	Contactor	Schneider	France
10	Air switch	Schneider	France
11	Start button	Schneider	France
12	Locating switch	Schneider	France
13	Hydraulic Pump		Taiwan
14	Hydraulic solenoid valve	Yishida	China

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.

GW1700-2 Servo Precision High Speed Sheet Cutter Machine

15	Pneumatic proportional valve	SMC	Japan
16	Reducer	Dasu	China
17	Proximity Switch	Panasonic	Japan
18	Bearing	FAG	Germany
19	Knife	Tungsten steel	German technology

Machine Parts

Picture	Description
	10-inch dual touch screen with Internet of Things: It can dynamically track, realize the synchronization between the management background computer or mobile phone and the machine screen, monitor the technical parameters such as the running speed of the machine and the number of paper sheets in real time, record information such as early warning and alarm, and realize remote program update and upgrade, as well as remote guidance. Machine maintenance.
	The control center adopts Siemens PLC
	Adopt Imported Electric comments such as Schneider, Panasonic, Inovance and Idec
	Floating aluminum roller deviation correction device

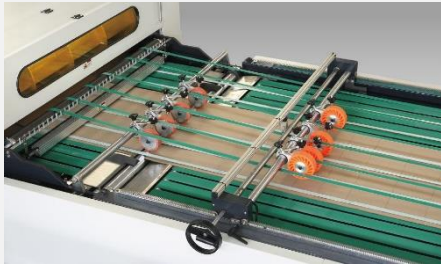

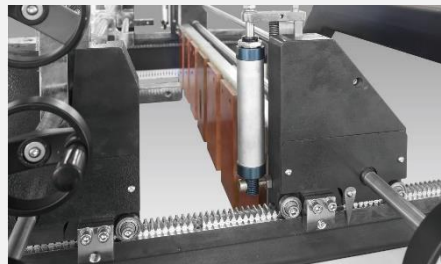

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.

GW1700-2 Servo Precision High Speed Sheet Cutter Machine

	Adopt high-precision screw device, equipped with tungsten steel blade
	Adopt sun wheel paper delivery device and rubber roller to press paper.
	The conveyor belt adopts Chinese, Japanese and other brands
	Equipped with the pneumatic automatic lifting function of the delivery baffle, which is convenient to operate and easy to enter and exit the paper stack.
	Double arm hydraulic shaftless discharge rack
	Guowei uses a large recurve device, which is different from the small recurve devices of other manufacturers. Adjust the paper warp caused by curling of the roll paper so that the paper is flat after cutting. Effectively improve production efficiency, increase production capacity and efficiency.

GW1700-2 Servo Precision High Speed Sheet Cutter Machine

	Adjust the knife part: Using ball screw, more accurate, automatic diagonal device, to ensure paper accuracy, more convenient operation
	Left and right adjustment at the paper receiving table.: use a ball screw; the paper receiving table lift is composed of chains and guide rails on both sides. The paper is more stable and the paper is neat and tidy.
	Equipped with label inserting device, and adjustable function of receiving paper vibration.
	Small deviation correction device to prevent paper from being cut diagonally
	Paper feeding guide rail
