

Features

Details

ARS178 is a domestic top technology improved automatic book sewing machine, up to 178 post per minute. ARS178 is the latest modified, the world's first main drive cam to use double bearing Transmission, longer service life, synchronous better performance, improve the stability of the whole machine.

You can click on the control panel to enter the equipment maintenance interface for electronic and pneumatic components can be checked directly displayed IO interface diagrams and location of electrical switches, circuit diagrams can without overhaul.

Suction device imported vacuum generator, compared with the traditional air pump to reduce noise, eliminating the heat generated by the wind pump itself, long-term use of maintenance free advantages.

Power section complete with imported Italian aluminum motor to achieve high efficiency low energy consumption. Compared with other models, can save energy more than two thirds, the whole power only 2 KW, real energy efficient equipment.

The core components of the machine. All of Germany Sa Site steel production by the Taiwan headquarter processing (such as cams, locking thread, etc.) to ensure that equipment precision long wear.

The power part completely adopts imported German Siemens motor to realize high efficiency and low energy consumption. Compared with other models, it can save energy by three points above bis, the power of the whole machine is only 4KW, real high energy saving effective equipment.

All imports of electrical switches, ensure that equipment runs more stable, more secure, longer life. (Japan Mitsubishi PLC, Taiwan Willen touch screen, Schneider electrical switches, etc.)

The core components of the machine. All of Germany Sa Site steel production by the Taiwan headquarter processing (such as cams, locking thread, etc.) to ensure that equipment precision long wear.

Ultra-short stitching and crochet stitching can easily and securely slide along the back of the signature into the hole punched out of the stitch. And the new cone shaped pin shot out of the hole is very small, very uniform, thus locking line better.

The trimmer at the device automatically trims the tail to approximately 10mm.

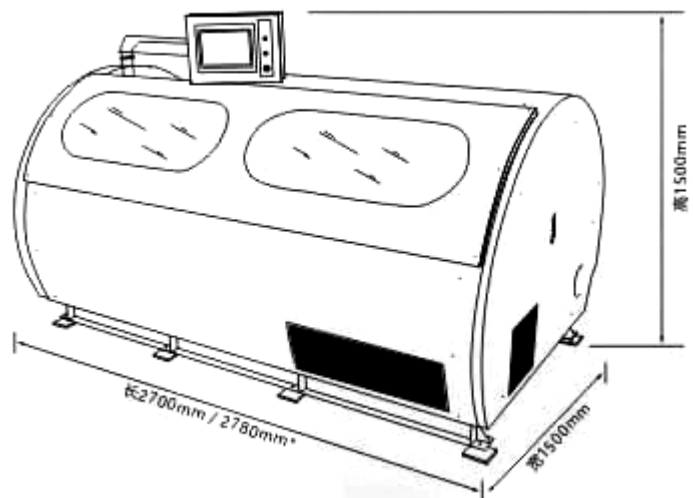

All pneumatic processing system of the whole machine are internationally renowned brands such as AVENTICS, FESTO from Germany and SMC from Japan.

Technical Specifications

Model	ARS178
Max. machine speed	178 post/min
Min. size signatures	75x120mm
Max. size of signatures	320x430mm (320x510mm)
The number of mortgage page	4 upper + 4 lower
Pin number	10 (12)
Pitch	19mm
Rated power	4KW
Standard voltage	380V, 50HZ, 3P
Consumption	500L/min
Net. Weight	3450Kg (3560Kg)
Dimensions	2700/2780x1500x1500mm
