

Machine Introduction

It is a paper surface varnishing (UV) and polishing machine which is suitable for the varnishing and polishing process of various paper (80-600g/m²); various paper prints after processing greatly improve surface gloss; the print surface has the damp-proof and water-proof effects. The machine adopts the reversing mechanism to make the oil layer thinner and more even.

The machine also adopts a computer air knife device, a strong absorption mechanism and a right-and-right scraper transmission mechanism. It has the characteristics of beautiful appearance, stable and reliable performance, simple and convenient operation and high automation degree

Function introduction of each part:

Automatic paper feeder: The automatic paper feeder has the function of pre-piling paper to guarantee coherent and stable conveying.

Polishing and varnishing head: The head adopts a three-roller reversal speed control head to guarantee aqueous polishing effect and no stripe mark; the metering roller is driven by the independent motor so as to ensure even gumming amount. The air knife device can be used for the paper less than 250 g.

Drying part: The infrared drying tunnel adopts 18 infrared tubes with 1.2 kw per piece. The ultraviolet drying tunnel adopts 3 ultraviolet tubes with 8 kw per piece. The inside of the drying oven adopts a UV automatic deviation-correcting device in high precision. The automatic temperature controller of infrared lamps has stable temperature. The more reasonable drying and cooling system with fan for assistance ensures the aqueous varnishing and drying effects; the infrared lamp and UV (ultraviolet) drying oven has an automatic rising-lowering protector.

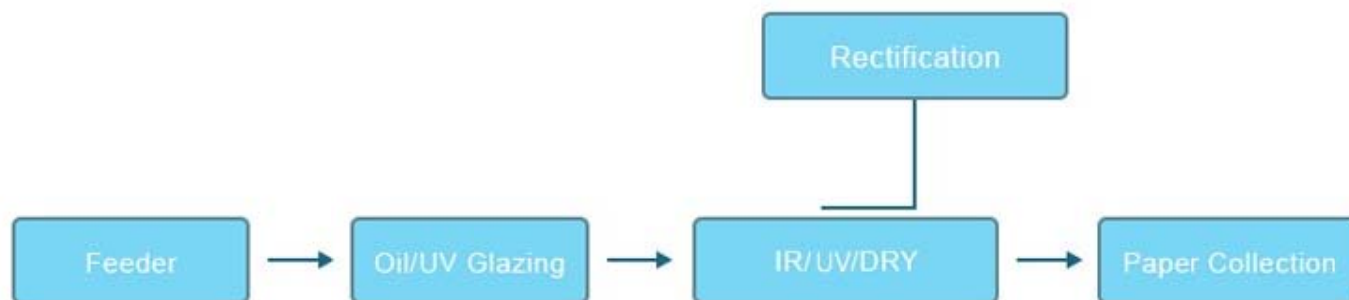

Automatic paper collector: The automatic paper collector pats paper right and left to ensure paper collection in order without shutdown.

Technical Specifications

Model	SE-1200 Manual	SE-1200 Automatic
Max. paper size	*	1150x900mm
Min. paper size	*	390x320mm
Length of Roller	1250mm	1250mm
Suitable Paper Thickness	80-600g/m ²	80-600g/m ²
Working speed	*	10-80m/min
Feeding paper pile height	*	1150mm
Collecting paper pile height	*	1050mm
Power	380v 50Hz 3P	380V 50Hz 3P
Motor Power	3.5kw	3.5kw
Total standby power	65kw	70kw
Infrared Heating Power	1.2kwx18pcs	1.2kwx18pcs
Ultraviolet Heating Power	3x8kw or 2x8kw	3x8kw or 2x8kw
Overall Dimension	9800x2000x1600mm	11800x2000x1800mm
Machine Weight	3200kg	4500kg
Oil type	Water base oil, UV oil, blister varnish oil, plastic oil	
Powder remover unit	Dimension: 1500x1600x1500mm Weight: 500kg	

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
