

SW-1050G

Fully Automatic High-speed Laminator Machine

GMB 光明

90 sec
Instant Heater

120 meter/min
High Speed

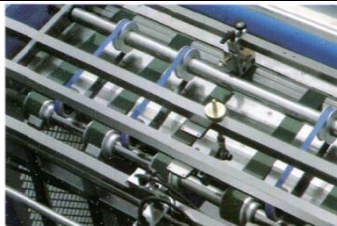

Machine Introduction

Features

1. Overlapping regulator: Servo control and front lay to guarantee accuracy of paper overlapping.
2. Smart constant temperature heating roller: Oil built-in heater, temperature measuring sensor and temperature controller to make the temperature stable and constant.
3. Film loader and unloader: Air expansion shaft with dividing rule make the loading, unloading and positioning of the film more accurate. The extension of film is controlled by pneumatic breaker.
4. Anti-curve device: It can avoid paper curvature due to shrinkage of film and make the paper smooth. It has the features of easy adjust and no shaking.
5. Electrical system: Schneider PLC inverter Omron and other international brand parts make the machine run smoothly, easy adjust.

Features

Auto Feeder This machine is equipped with a paper pre-stacker, servo controlled feeder and a photoelectric sensor to ensure that paper is continuously fed into the machine		Anti-curvature Device The machine is equipped with an anti-curl device, which ensures that paper remains flat and smooth during the lamination process.	
Human-computer interface A user-friendly interface system with a colour touch-screen simplifies the operation process. The operator can easily and automatically control paper sizes, overlapping and machine speeds.		Corrugated Delivery A corrugated delivery system collect paper easily

SW-1050G

Fully Automatic High-speed Laminator Machine

GMB 光明

Electromagnetic Heater Equipped with advanced electromagnetic heater. Fast pre-heating. Energy saving. Environmental protection.		High Speed Automatic Stacker The pneumatic stacker receives the paper, keeping them in order, while rapidly counting every sheet.	
Side Lay Regulator The Servo controller and Side Lay Mechanism guarantees precise paper alignment at all times.		Double Film Shaft Saving time of film loading and uploading, improving efficiency	
High Speed Separating System This machine is equipped with a pneumatic separating system, pneumatic perforating device and photoelectrical detector to rapidly separate the paper according to the paper size.			

Technical Specifications

Model	SW-1050G
Max Paper Size	1050x1200mm
Min Paper Size	350x350mm
Paper Thickness	105-500g/m ²
Laminating Speed	0-120m/min
Gross Power	25kw
Weight	5000kg
Overall Dimensions	9550x2400x1900mm
Pre-stacker	1850mm

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
