

Machine Introduction

This machine mainly aimed at the opening of the casing box. It can also be used to print all picture on, this machine in the production process of productive technology have special requirements, please detailed inquire the sales manager.

Features:

1. The machine adopts cast-iron structure and has such characteristics as long service life and non-deformation
2. The machine adopts immersion coating method to make coating more uniform and glue saving. This making the glued coating roller has such characteristics as non-crusting, non freezing, easy cleaning, reasonable structure and easy operation
3. The machine adopts four-roller double pressure laminating to make product quality stable and reliable and itself more suitable for thick and thin paper laminating
4. Five sets of finished product rolling trolleys equipped with the machine can make products have enough time to solidify
5. Operating power of the machine is single-phase 220V. Adopting National transducer made in Japan and imported famous-brand control electric elements, the machine can run steadily without faults
6. It is equipped with automatic punching device which can effectively improve production efficiency

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.

Technical Specifications

Model	SKM-1000
Effective width	950 mm
Paper thickness	>250 gsm
Speed	0-50 m/min
Total power	5.5 kw
Overall weight	2000 kg
Overall dimensions	3080 × 1500 × 1400 mm

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
