

Machine Introduction

This machine is designed to manufacture square bottom paper bags with handles from sheet paper in blank or printed. Combined with a handle making machine, handle making, handle application, bag mouth folding, side gluing, tube forming, bottom impressing, bottom gluing, bottom forming and final product collection can be completed within a fully automatic process. It is an ideal equipment for making paper bags for foodstuff bags, shopping bags and so on, and can produce paper bags of different sizes.

Features :

1. The whole machine is mainly controlled by inverter-fed motor; touch screen is adopted for input control and machine status display.
2. Separate sheet paper feeder is adopted for feeding sheet paper automatically, fleetly and steadily.
3. The handle making component is an independent machine, which is driven by the main motor and can make paper handles separately if equipped with separate motor for driving; handle length is adjustable according to bag size.
4. Pasting the handles onto paper is driven by main motor with automatic glue stirring function when machine stops; positions of U-shape cutting and side cutting of bag mouth can be adjusted left-right and forward-backward; bag mouth folding function, makes bags solid and artistic; claw-shape paper carrying method is adopted for paper feeding and handle conveying; waste handles conveying and collection device, which ensures easy operation.
5. Adjustable moulds are adopted for tube forming; during side creasing the transmission is made by groups of rollers and conveyer belts, whose driving force is provided by main motor; side glue application adopts hot-melt glue spray pattern.
6. Multi-layers bottom forming drum, center grippers, second tuck clamps, and drum grippers are adjustable for ease of changeover; automatic disengaging function (bottom gluing is prevented for empty feeding to avoid contamination to the surface of the drum).
7. Finished paper bags are collected at workbench, which is easy for operations; bag collection adopts vertical structure and is driven by main motor.

Technical Specifications

Model	ZD-QFP14B
Paper width	630-1050mm
Paper length	380-600mm
Paper thickness	100-220g/m ²
Bag body width	220-355mm
Bag length	250-480mm
Bottom size	70-160mm
Bag mouth fold width	40-60mm
Handle Rope Height	170-185mm
Handle rope diameter	4-6mm
Handle patch length	188.5mm
Handle patch width	40mm
Paper strip roll diameter	1200mm
Paper strip roll width	80mm
Paper strip thickness	120-250g/m ²
Max. Production speed	60bags/min
Total power	20Kw
Weight	Approx.22000 kg
Overall dimension	16000x4300x2600mm
