

Machine Introduction

Models ZKT-500 Window Patching Machine are widely used for sticking films on the windows of various paper boxes, e.g. tissue box, medicine box, shirt box, etc. It is developed on the original window patching machine in light of customers' requirements. Our research and development team, through the continuous improved & perfect human design, let the machines be easier to operate and better in efficiency, accuracy and stability. Both basic components and major automated accessories employ the proprietary technology of this company. Therefore, 500 Window Patching Machine can meet customers' requirements at a higher level.

Machine Features

Paper Feeder

Flat belt paper suction mechanism, paper feeding without shutting down the machine, position checking mechanism and accurate locating.

The Gluing Section

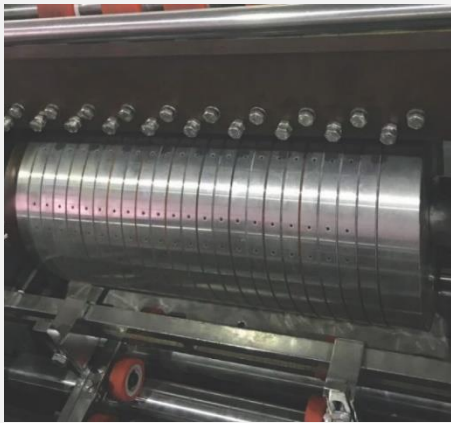

Disk glue applying mode is adopted to ensure applied glue is well distributed and the amount of applied glue can be effectively controlled.
