

Machine Introduction

This machine is designed to manufacture square bottom paper bags from sheet paper in blank or printed. Side gluing, tube forming, bottom impressing, bottom gluing, bottom forming and final product collection can be completed within one time by this machine. It is an ideal equipment for making paper bags for foodstuff bags, shopping bags and so on, and can produce paper bags of different sizes.

Features :

1. The whole machine is mainly controlled by inverter-fed motor.
2. Separate sheet paper feeder is adopted for feeding sheet paper automatically, fleetly and steadily.
3. Disk-type creasing device (both of the up and down parts are adjustable) can be adjusted for making various bags with different widths.
4. Adjustable moulds are adopted for tube forming; during side creasing the transmission is made by groups of rollers and conveyer belts, whose driving force is provided by main motor; side glue application adopts hot-melt glue spray pattern.
5. Multi-layers bottom forming drum, center grippers, second tuck clamps, and drum grippers are adjustable for ease of changeover; automatic disengaging function (bottom gluing is prevented for empty feeding to avoid contamination to the surface of the drum).
6. Finished paper bags are collected at workbench, which is easy for operations; bag collection adopts vertical structure and is driven by main motor.

Technical Specifications

Model	ZD-FP14B
Max. production speed	80 bags/min
Total power	13 kw
Weight	8000 kg
Overall dimension (LxWxH)	13000 x 2100 x 1580 mm

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
