

Machine Introduction

This machine is used for paper counting, usually used for counting and labeling countable papers such as notebooks, instruction manuals, books and magazines, test papers, sketching paper, stickers, etc. and for reviewing book and journal page numbers.

Features:

- Insert labels for the number of classes in the test paper materials, which can be set according to different class sizes
- The binding factory inserts and counts the same content book block and notebook core equally
- Accurate and high-speed counting of various conventional papers within the parameter range, and special papers (depending on the actual situation)
- Equipped with self-diagnosis function, the operator can determine whether it is an operational error or an abnormality caused by a machine malfunction through clear information display on the fault detection interface
- Fully PLC controlled, using Mitsubishi controllers and Mitsubishi servo motors, with stable and reliable circuits and accurate counting
- Large human machine touch interface, easy to operate and learn
- Key parts are made of special steel and processes, which are durable
- The machine head is supported by three pillars to ensure stability in lifting and lowering, and has independent patents

Technical Specifications

Model	DS-2000F
Countable paper size range	65x65mm – 750x1050mm
Countable paper gram range	30g/m ² - 230g/m ²
Max. operating speed	2000sheets/minute
Insert label paper specifications	Width of 5mm, total length of 85mm
Max. paper loading/counting height	170mm
Platform size	Air cushion platform 750x1050mm
Table height	780mm
Rated voltage	220v
Rated power	0.75kw
Machine dimension	L525xW350xH1300mm
Machine weight	103kg
