

Machine Introduction

Guowei paper-breaking machine series has the functions of paper-breaking, paper-organizing, and air-blowing. It can quickly sort paper of various textures or other paper-like materials, effectively improving work efficiency and shortening working time. The worktable consists of an air cushion device, a vibration motor, a paper pressing rod, a driving roller and a driving cylinder. The programmable controller completes all the paper-breaking processes and is easy to operate. Therefore, the machine has the advantages of advanced paper management, fully automatic left and right baffles, automatic exhaust, and high efficiency.
