

TYMK-S Series

Automatic Foil Stamping and Die Cutting Machine

Machine Introduction

This automatic foil stamping and die cutting machine is designed and produced by our company under years of producing experience. With great effects on improving the quality of printing and package products, it becomes the necessary equipment for large size foil stamping and die cutting. For the purpose of saving foil, improving stamping speed, more profits with less investing, economical and practical, this machine is an organic products integrated with mechanical and electrical which is mic-computer controlled for feeding foil and leapfrog, automatic constant temperature controlling and digital date output. It is very easy and save for operation. It has large pressure, high automation and special device for accurate stamping so as to improve the adhesive power of the foil and perfect products.
