Machine Introduction

This machine is specially designed for notching V type groove, use for industry-cardboard, Ash-cardboard, MDF board and other type of cardboard. It adopts new way of transportation principle. Wrap the cardboard on the entire surface of the roller (the diameter is 60cm). It can guarantee the groove more accurately, no deviation and straightly. The machine has the features of high accuracy, fast speed, and durable cutting blade.

Fax. (021) 668 5874, 660 2657

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.

Features:

1. After notching, the surface of cardboard is very clean and no dust
2. The machine is very economical, total power is only 3.7KW only and has low noise
3. The machine can produce about 1000 pcs boxes per hour
4. The cutting blade can cut 10000-18000 sheets one time, then you should sharpen the blade and it takes 2 minutes only. The sharpen machine is included with the machine and very easy to operate
5. The cutting degree is adjustable
6. The machine could groove any thickness from 300gsm-3.6mm without any adjustment

Technical Specifications

Model	KL-1000
Width of cardboard	100-950mm
Length of cardboard	100-950mm
Distance of each groove	0-830mm
Cardboard thickness	300gsm-3.6mm
Grooving degree	80-140°大小可调adjustable
The amount of groove	9 pieces one time
Production speed	10-35m/min
Power	3.7Kw/380V 3phase
Overall dimensions	L1500×W1400×H1600mm
Total weight	1380Kg

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
