

Machine Introduction

The machine can produce the square bottom paper bag in conjunction with overseas advanced technology. The machine has many advantages such as high speed, high productive efficiency and wide range adjustment. Automatic raw material feeding, automatic errors correct system and tension control, all these operational procedures are controlled by PLC. This is ideal equipment for producing various kinds of paper bags such as food paper bags, cosmetic handle paper bags, etc.

Features:

1. Equipped with servo system with photocell for correction, tracking the printed material accuracy.
2. The electric control system promotes high speed, high precision motion control and production line, It detects automatically effect of integration and optical fiber.
3. The touch screen display simplifies machine operation.
4. The glue applicator system helps glue to move automatically as machine running.
5. Automatic fault detector and self diagnosis system reduce the chance to damage machine.

Technical Specifications

Model	SB-180
Paper bag width	80-190mm
Bag bottom width	45-100mm
Tube length	191-371mm
Maximum roll width	600mm
Machine speed	200pcs/min
Paper thickness	45-120gsm
Diameter of material	1,300mm
Main motor	15KVA
Air pressure	690KPA
Machine weight	5000kg
Machine size	1600x9200x 1750mm
