

XT-380

Silicone Paper Sticking Machine (Envelope Peel & Seal Machine)

Machine Introduction

This machine is used to stick cold gule and silicone tape for the flap of envelopes.

1. It can adopt either thermosol injection or liquid gum process for production in accordance with different customer needs.
2. It adopts the PC program control to ensure the position of automatic gum spraying and the stability of gum amount
3. The stepless regulation mechanism sets the gum length
4. The bottom flat paper feeding solves the problem of insufficient air flow in case of board paper
5. It can open the envelop flap tape, fold it again and recover the original (leveling) shape of the envelop automatically.

Technical Specifications

Max. speed	10000 pcs/hour
Max. sealing specification	324 x 229 mm
Min. sealing specification	100x100 mm
Overall dimension	2800 x 950 x 1700 mm
Overall weight	1800 kg
Overall power	6.5 kw
Applicable paper	60-157 gsm
Width of peel base paper	12-48mm
Applicable paper for peel base paper	35-120 gsm
Adhesive spraying width	1-40 mm
