

### Machine Introduction

YFM-920 semi-auto laminating machine is a pre-glued film laminator which is designed and manufactured according to the market needs. This machine can finish both lamination and separation processes at a time. This machine use oil heating roll. The machine adopts pre-glued film for the lamination of packing bags, books, maps and drawings etc. The laminated products will be water-proof, durable, of clear picture and spatial effect.

### Features:

1. Using converter to control speed, running steady.
2. Due to machine controlled by electric appliances, so it only needs one operator to operate.
3. The main machine uses oil to keep constant temperature. So the temperature of heating roller's surface is average.
4. Large diameter mirror heating roller, temperature lasting not easily erosion, production speed is high.
5. Lord pressure roller uses high temperature resistant material, quality is stable.
6. Manual oil pressure supply system, secure pressure step up and down.
7. Film slitting and punching to be equipped.

### Technical Specifications

|                    |                    |
|--------------------|--------------------|
| <b>Model</b>       | <b>YFM-920</b>     |
| Max. paper size    | 920 x 660 mm       |
| Laminating Speed   | 25 m/min           |
| Pressure           | 10-16 Mpa          |
| Paper thickness    | 105-500 gsm        |
| Power              | 15.7 kw, 380V/50Hz |
| Total Weight       | 1400 kg            |
| Overall Dimensions | 3000x1740x1750 mm  |
