01 Description

Classical stop cylinder mechanism, cylinder stops step automatically to ensure the forehead of the printing stock can be sent accurately to the gripper of cylinder, which is up to extreme high precision; at the same time, gripper of cylinder and pull side-lay both have the magic eyes for supervising if the printing stock is in correct place, which can reduce the waster effectively. The bottom of convey table with vacuum absorption, assembled with the pull and press mechanism, ensure printing stock delivered smoothly. Two cams separately control the movement of squeegee and ink-return blade; squeegee with the pneumatic pressure kept device, the printing graphics is more clearly and the ink layer is more well-proportioned. The screen frame rack can be pulled out, which is easy for adjusting the register of feeding, as well as cleaning the cylinder and screen frame; at the same time, it is assembled with device to hold the ink dropped to avoid the ink drops on the cylinder. Main transmission and main parts lubricate automatically, prolong the using precision and machine life in effect. The whole machine controlled by PLC, can choose touch screen for operating, which is very easy and high degree automatism. It can be used with JB Series screen drying machine, UV dryer, UV & IR dryer and automatic stacker to form the full automatic screen printing line.

02 Technical Specification

Model	JB-720A	JB-800A	JB-1020A
Max. paper size	720 × 520 mm	800 × 600 mm	1020 × 720 mm
Min. paper size	350 × 270 mm	350 × 270 mm	560 × 350 mm
Max. printing size	720 × 500 mm	800 × 590 mm	1020 × 710 mm
Paper thickness	104-400 g/m2	104-400 g/m2	120-400 g/m2
Border	≤10mm	≤10mm	≤10mm
Printing speed	1000-3600 pcs/h	1000-3300 pcs/h	1000-3000 pcs/h
Power	3P 380V 50Hz 8.3KW	3P 380V 50Hz 8.3KW	3P 380V 50Hz 13.9KW
N. weight	3500kg	5800kg	7000kg
Overall size	4200 × 2800 × 1600mm	4300 × 2550 × 1600mm	4800 × 2800 × 1600mm

* Warna, bentuk, dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
