

Machine Introduction

The machine is a medium-size single-blade paper cutting machine applicable for cutting folio paper and different kinds of printed products such as books, magazines, cards, etc. The machine is simple in construction and convenient in operation and maintenance. Operator can easily master the constructional features and performance of the machine to raise productivity. Although paper has to be fed and held down manually, arbitrary hold-down pressure against paper is thus available to avoid the disadvantage resulting from improper hold-down pressure. The paper-cutting blade holder is driven by a motor, but it can also be operated by means of a handle to suit the needs of the location where power supply is not yet available. Its D-feed, pressure paper cutting can proceed. Second, dynamic, and electrical use.

Technical Specifications

Model	DQ-201
Max. cutting width	920 mm
Max. cutting length	1000mm
Max. cutting height	120 mm
Mechanical cutting speed	23 times/min
Motor specification	380V, 1.5 kw, 1420 r/min
Net weight	1200 kg
Overall dimension	2110 x 1970 x 1740 mm

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
