

Machine Introduction

“Huawei” brand YZFM-540 Automatic Pre-coated Film Laminating Machine is controlled by the Delta PLC. One person operates easily. High automatic equipment can shorten the time of procedure and enhance efficiency. The diameter of main pressing steel roller is 380mm. This steel roller is heated by oil. So temperature can reach 85-140°C. This machine is equipped with film separating and punching devices.

Features:

1. High speed feeder: Four suction nozzles achieve high speed and high precision.
2. Laminating unit (Optional configuration: Laminating two sides): The diameter of main pressing steel roller is 380mm. This steel roller is heated by oil. So temperature can reach 120-140°C. This machine is equipped with film separating and punching devices. Paper overlap adopts servo technology, so the precision is high. Be based on the requesting of customers, this machine could laminate two sides.
3. Separating unit: Separating unit adopts pneumatic device, it is automatic and live in a small area, operated easily.
4. Automatic stacker: During high speed running, with the help of paper pressed device, make delivery smoothly.

Technical Specifications

Model	YZFM-540
Max. Sheet size	740x540mm
Min. Sheet size	290x290mm
Paper thickness	105-450 g/m ²
Max. Laminating width	540mm
Film supply	Pre-coated/Thermal film
Max. Production Speed	105-157g/m ² , 20m/min – 157-450g/m ² , 35m/min
Laminating temperature	Approx. 85-140°C
Total power	18.7kw
Air compressor	3kw
Dimensions	3900x1600x1900mm
Total weight	2100kg

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
