

Machine Introduction

Full-automatic punching machine paper is an equipment specialized in paper-board punching, mainly used for hole punching in the calendar, notebook, exercise book, gray cardboard, PP board, etc, but it is unavailable in metal and other. This machine can unwind papers by step drive and adjust paper thickness. After absorbing papers, they can be transferred into punching die by conveyor belts. After finishing the papers from three sides, go to punching. After punching, the paper enters the delivery device automatically, are arranged according to the order. The paper sizes and page margins can be adjusted. We can punch various holes by replacing different shapes punching die.

Technical Specifications

Model	JT-420
Max. punching size for cover	285x285mm
Min. punching size for cover	148x120mm
Max. punching range for inner-sheet, PP plate	420x420mm
Min. punching range for inner-sheet, PP plate	80x75mm
Min. punching thickness	2mm
Max. paper stack height	500mm
Max. working speed (inner sheet)	4800-7200 times/hour
Max. working speed (inner sheet)	1800-6000 times/hour
Paper specification	50-250g/m ²
Power	AC380V/3PH/50HZ/3KW
Machine dimension (LxWxH)	2000x1000x1300mm
Machine weight	800kg
Air compressor (excluded)	0.37kw
Air compressor	4-6 bar
