

Machine Introduction

Features:

1. PLC programming control system.
2. ϕ 320 chrome plated roller with built-in oil heating system, temperature is more uniform and stable, excellent constant temperature performance.
3. air expansion and release film, film roll convenient loading and unloading, accurate positioning, and release film tightness can be adjusted according to the need
4. swing knife slitter system, two kinds of punching device for users to choose different specifications of paper and film
5. corrugated paper output system, vibration paper receiving system configuration more convenient, neat.
6. machine split structure, convenient maintenance.
