

Machine Introduction

1. Mechanical transmission, energy-saving, stable and simple operation, microcomputer detection and domestic advanced technology products.
2. The device is automatic paper molding equipment, has the advantages of high speed, convenient operation etc. This machine adopts built-in hot air generator, suitable for single PE coated paper.
3. Through the automatic feed paper, Corner heating (comes with hot air generating device), Fold the cover (by mechanical device), hot press molding (adhesive box four corners), automatic points collected, microcomputer control of continuous processes. For the production of single-cell disposable paper boxes, paper lunch boxes, food packaging boxes.
4. The fastest working speed is 30 times per minute. Domestic leading speed level, it has the monitor computer system. If the fault the machine will stop and alarming.

Technical Specifications

Production capacity	25-30 pieces/min (actual production is subject to product size)
Max. paper size	350x450mm
Suitable material	100-400g/m ² PE Coated paper
Total power	8KW
Voltage requirement	380V/50HZ
N. weight	1000 Kg
Overall dimension	2280 (L) x 1500 (W) x 1500 (H) mm
Gas source requirement	0.4-0.5 Mpa
Gross weight	1100 Kg (wooden box packing weight)
Grouped equipment	Need to buy air compressor
Working volume	0.4-0.5m ³ /min
