

Machine Introduction

- The machine is running steady with strengthened single. Side driving system, and it is also easy for maintenance.
- The motor is controlled by transducers (inverter) which are available for automatic timing. It is power saved, and it helps to work stably.
- Paper is feed by several thick belts under the help of vibration motor. Feeding is continuous, exact and automatic with this system.
- Grinders are provided in both sides of machine, to make gluing more stable and firmer.
- There is a PLC system controlled by human through touch screen in this machine to make operation more convenient.
- It is in special design for the E/B flute. The spare parts are: Siemens Motor, Schneider Electric, Japanese Nitta Belts and Japanese Bearings.
- The pressing unit is in pneumatic design (air pressure system).
- An option for paper feeding length of 1.2m is available after the special design.
