

Machine Introduction

- It is running steady with strengthened single side driving system, and it is also easy for maintenance.
- The motor is controlled by a transducer (inverter) which is available for automatic timing. It is power saved and it helps to work stably.
- Paper is feed by several thick belts under the help of vibration motor. Feeding is continuous, exact and automatic with this system.
- Grinders are provided in both sides of machine, to make gluing more stable and firmer.
- An infrared photoelectric control system is in this machine, pressing unit and counter will work synchronously with the feeding speed
- Machine will slow down and stop running when no sheet there. And it's also able to reduce waste.
- Small box like out-put size at 35mm is able to be done after the special design.

Technical Specifications

Line speed	0-160m/min, Continuous adjustment
Usage paper	250-500 g/ms, paperboard
Box forming	Straight line box
Fold method	2nd & 4th folds 180°
Paper feeding	Automatic feeding, grinding unit
Electric Power	2.4kw
Dimension	6.1*1.1*1.4m
Weight	1500kg

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.

PT. EKA MAJU MESININDO
