

Machine Introduction

The manufacture of this model started in 1994 in Huawei. This machine are the new style laminating presses. It can let Biaxially Oriented Polypropylene or polyester film laminated on any kind of printed matters continuously and make the laminated products bright, clear and beautiful. Besides, it is also water-proof and easy to keep clean. It's widely used for laminating plastic film on the following materials, such as the cover of books and periodicals, pictures, calendars, cards, sample books and packing boxes ,etc. It's reasonable in structure, working smoothly, easy operation, safety and reliable, and suitable to be used in various printing plants for matters, package and artistic printing jobs. This machine is suitable for glue and oil glue dual purpose.

Features:

1. The machine frame adopt high quality material. It is provide with automatic temperature control unit
2. It is sealed oven of the infrared camp as hot source. It is equipped with the reverse scraper glue-even unit and automation glue-circulating system
3. Gluing and glue spreading adopts variable frequency speed regulating with high accuracy and uniform coating of glue
4. It is equipped with automatic punching device which can effectively improve production efficiency
5. Compounded heating roller adopts polishing technique, improves the quality of the products
6. With hardness of 90 degrees of main pressure rubber roller can meet different quality paper compound requirements. This rubber roller adopts heat-resistant material, suitable for long time suitable for special high temperature requirements without film production. Special emboldening shaft head adopts the special steel by heat treatment not easily broken
7. Oil cylinder materials use high quality nodular casting parts, can load pressure working environment

Technical Specifications

Model	FM-1000	FM-1100
Max. width	950 mm	1050mm
Pressure temperature	30-120°C	30-120°C
Pressure compound	2-25 Mpa	2-25 Mpa
Max. speed	0-25 m/min	0-25 m/min
Total power	30 kw	30 kw
Overall weight	3200 kg	3500 kg
Overall dimensions	5920 x 1620 x 2090 mm	5920 x 1720 x 2090 mm

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
