

Machine Introduction

The machine integrates Chinese and western styles, which can produce Chinese envelope from No.1 to No.9 and western envelopes from 2 to 7, as well as various non standard and paper bags in the same range. The machine employs internationally populous flat-type papered structure with advanced structures of bottom air-suction paper extraction, roller fence air-suction horizontal fold, tank-wheel feed, vertical fold, etc. It has stable and reliable quality, highly efficient product and convenient adjustment. It is the right equipment for large volume continuous operation and small volume envelope production.
