

Machine Introduction

Water-based film laminating machine is full environment-friendly laminating machinery, it uses environmental protection of water-base glue, which can be put film (BOPP) or polyester film laminate with print. Products has a high degree of transparency, good dimensional sense, and easy to stick. There is no snow, and non-foaming, non-toxic, and tasteless. The products are widely used in windows packing carton, textbooks, book cover, pictures, calendars, product samples, packaging carton mounted plastic, which is an ideal equipment to improve print quality.

Features:

1. The machine adopts inverter, with stable performance.
2. It equips with the automatic stopping for lacking paper, paper count, treatment of finished product fast pushing systems.
3. This machine has a compact structure and reasonable, with high-speed and energy-saving.
4. Adopt immersion coating method, the pump automatic purvey glue.
5. Power supply for 220V, 50HZ.
6. The machine adopts Cast-iron structure, long service life, no deformation.
7. The machine using four rollers double pressure Lamination, product quality is stable and reliable.

Technical Specifications

Model	SDFMW-1000
Effective Width	900 mm
Speed	0-50 m/min
Total Power	1.5 kw
Net Weight	900 kgs
Overall Dimensions	2600x1600x1500 mm
Power	220 V / 50 Hz

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
