

Machine Introduction

TM-LII Automatic Paper Cup Sleeve Forming Machine is the supporting equipment of Automatic Molding Machine of Paper cup and bowl, with the advanced technology and reasonable design, it has the functions of automatic paper feeding, sealing, spin coating, error warning, counting and so on. Overcoat Machine of Paper bowl has two forms of expression: Direct packing overcoat machine and hollow overcoat machine. Direct -packing overcoat machine means that the overcoat is directly attached outside of white paper bowl, without the gap between the inner layer, with the rolling bottom in the bottom of outside layer, it is more heat-proof than the direct-packing.
