

Machine Introduction

This machine is mainly supporting high-speed paper handle machine and paper bag machine. It can quickly produce circular paper rope, so as to provide raw materials for paper handle machine. This machine takes narrow paper roll as raw material, and twists the paper into rope through the fast rotating shaft and keeps the final product in the roll pattern. According to users' different requirements, they can adjust the paper rope diameter directly, as well as customize the special model of this machine, which can simultaneously produce two paper rope rolls on one machine, thus greatly improve production efficiency.

Technical Specifications

Model	ZD-YS300
Core diameter of raw rope roll	76 mm (3")
Max. Paper Rope Diameter	450 mm
Paper roll width	30-100 mm
Paper thickness	15~60 g/m ²
Paper rope diameter	φ 2.5~5 mm
Rope roll core diameter	76 mm (3")
Max. rope roll diameter	250 mm
Max. rope roll width	300 mm
Production speed	5~30 m/min
Power requirement	220V, single phase
Total power	1.1 kw
Total weight	Approx. 300kg
Overall dimension	L900xW1300xH800 mm

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
