

HSCJ-1400B

Servo Precision High Speed Sheet Cutter Machine

Machine Introduction

HSC web cutting machine apply the advanced technique of Taiwan and Britain, The machine is transmitted by servo motor. The speed of cutting paper is fast and stable. Germany precise bear and cutting knife assure the high cutting precision. Touch screen computer interface control, simple operation, reasonable structure, anti-music stands, to ensure smooth paper.

Features

1. High-precision single knife cutting machine
2. Auto Prismatic adjustment system for paper
3. Middle slitting and waste collection paper system
4. Automatic counting and label inserting equipment (count marking)
5. Paper transporting equipment
6. Automatic paper trimming and collecting machine
7. Electrical controlling system
8. Driving motor
9. Accessory
10. Single lime pneumatic shaft paper rack (roll stand)

Note:

Output: Actual yield based on the paper texture, paper weight, cutting length, volume, number, operator technical paper, operations.

HSCJ-1400B

Servo Precision High Speed Sheet Cutter Machine

Cutting unit

On the knife the British cutter method to reduce the load and noise when the cutter extend cutter life. On knife roller body to steel welding gave precision machining, and dynamic balance adjustment, effectively reduce the vibration and noise of the high-speed operation.

Under the knife: knife block with cast iron integrally molded casting, precision machining, good stability. The back cutter: made of special steel precision knife processing, long life blade easily adjustable.

Electronic control

TPC7062KS and HUICHUAN Processor communication, Mainly used in the production of data input equipment operating status monitoring, and system failure alarm indication. The rotating series drives HUICHUAN quick drive, based on the production of man-machine interface input parameters from the actual speed traction roller encoder feedback and accurate positioning.

The delivery section using automatic set paper equipment

Lift stacked set paper sets, the paper stack to a considerable height, that is automatically dropped. The stacker table has three sides shake finishing function ,the side of the motor to drive the paper, the paper, on both sides by high-quality pneumatic by hand wheel to adjust the amplitude of the paper to improve the simplicity and safety of the operation.

HSCJ-1400B

Servo Precision High Speed Sheet Cutter Machine

Curly Device

Curly device is in the paper roll before slitting device to eliminate the roll curl or fold device, in order to the stability of the paper roll tension. The paper roll first passes through (to the edge of the roll) components into the deconvolution device, the rollers are guide roll.

The new Anti curvature device

Effectively remove the curl of the roll to make the paper more flat, more conducive the paper roll tension stability.

Adjust The Angle Automatically (paper aligning system)

The precision of the stepper motor is controlled by the length of the cut precision screw adjustment the inclination of the knife group, to effectively ensure the straight angle of the edge of the cut sheer ,reducing waste time manually adjust the angle of error rate and adjustment

Slitting knife

Three sets of slitting knife is used to trim and middle slitting.

HSCJ-1400B

Servo Precision High Speed Sheet Cutter Machine

Technical Specifications

Model	HSCJ-1400B
Measurement of the machine	12000*2800*2400mm
Weight	12000kg
Max Speed	300cuts/min
Voltage	380V, 28kw, 3Phase
Packing size	40HQ Container
Reference weight of cutting paper	50-550g
Cutting accuracy	+ - 0.3mm
Cutting length	430-1650mm
Maximum scroll diameter	1800mm max
Maximum paper cutting width	1400mm
The format of slitting	2 sheet
Max cutting mater speed	300m/min
Air pressure source requirements	0.8Mpa
Cutter maximum load	Single card paper - 500gsm must consider the density and quality

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
