Machines

01 Description

LZ-1000 Separating and Cutting Machine is a kind of corollary product for laminating machine and is suitable for automatically separating and cutting various papers laminated on single-paper laminating machine. With such characteristics as compact structure, high speed, high efficiency, simple and reliable operation and smooth running, etc, This machines a kind of accessory equipment used in printing plant for improving laminating efficiency.

02 Features

- 01 The machine adopts cast-iron structure and has such characteristics as long service life and non-deformation.
- 02 The machine adopts immersion coating method to make coating more uniform and glue-saving, this making the glued coating roller has such characteristics as non-crusting, non-freezing ,easy cleaning, reasonable structure and easy operation.
- 03 The machine adopts four-roller double pressure laminating to make product quality stable and reliable and itself more suitable for thick and thin paper laminating.
- 04 With such functions as automatic constant temperature, the glue barrel can prevent glue from freezing and effecting the laminating effect because of too low temperature.
- 05 Five sets of finished product rolling trolleys equipped with the machine can make products have enough time to solidify.
- 06 It is equipped with two sets of heating devices.
- 07 Operating power of the machine is single-phase 220V. Adopting Omron converter made in Japan and imported famous-brand control electric elements, the machine can run steadily without faults.
- 08 It is equipped with automatic punching device which can effectively improve production efficiency.

03 Technical Specification

Model	LZ-720	LZ-1000
Max cutting width	670mm	950mm
Max cutting speed	90m/min	90m/min
Power	2.85kw	2.85kw
Weight	500kg	600kg
Dimensions	2020x1245x1160mm	2020x1445x1160

* Warna dan spesifikasi mesin bisa berubah sesuai dengan perubahan spesifikasi pabrik.
